

Content & Videography Intern

Summer 2026 · Full-time · 2 Months · On-site at QSTP

About Vora

Vora is a Qatar-built hardware + software startup that turns any existing air conditioner into an optimized, Gulf-tuned cooling system without replacing the unit. Our AI-powered device sits in the room, learns the AC's remote, and continuously manages it to reduce energy waste by ~30% while keeping comfort steady. We also detect early signs of AC issues before they turn into breakdowns and leaks. Vora is incubated by QSTP and has been recognized by Qatar's Minister of Environment and Climate Change

The Role

We're looking for a content and videography intern to create short-form social media content for Vora. You'd be shooting, editing, and appearing on camera, all under the creative direction of the founder leading marketing. You'll be producing content consistently that helps people across the GCC understand what Vora does and why it matters.

What You'd Be Working On

- Shooting and editing short-form videos for Instagram Reels, TikTok, and YouTube Shorts
- Filming setup walkthroughs, before/after scenarios, and behind-the-scenes startup content
- Building a content library that feeds into marketing, competitions, and investor materials
- Executing on creative briefs and scripts provided by the marketing lead

What We're Looking For

- Can shoot quality video on a phone or camera. Understands framing, lighting, and audio basics
- Can edit short-form videos (CapCut, Premiere Pro, DaVinci Resolve, or similar)
- Has a feel for what works on social media. You scroll Reels and TikTok and understand why certain content performs
- Bilingual in Arabic and English. We create content for both audiences across the GCC
- Can take a script or creative brief and turn it into a finished video without needing direction on every cut
- Reliable and consistent. Content has a rhythm and we need someone who shows up

Bonus Points

- Has a portfolio, personal brand, or social media account with content you've created
- Can do motion graphics or animated text overlays, not just basic cuts
- Photography skills for stills we might need for web, pitch decks, or social posts
- Interest in tech, sustainability, or startups. The content feels more real when you actually care about what you're making

Details

- Duration: 2 months, full-time
- Dates: June 1 – July 30, 2026
- Location: On-site at our QSTP office, Qatar
- For any queries, email anas@vora.qa or mazen@vora.qa
